THE MYSORE CHEMICAL MANUFACTURES, LTD.

TELEGRAMS: "ALUM," BANGALORE

CODES: A.B.C. 6TH EDITION

SECRETARIAT
DEVELOPMENT BRANCH.

KRISHNA BUILDINGS
AVENUE ROAD
BANGALORE CITY

27th November, 1939.

The Government Director,
Industrial Concerns,
BANGALORE.

Dear Sir,

We beg to refer to the discussion which the undersigned had with you regarding the acquisition of lands near Belagola in the proximity of the factory of the Mysore Chemicals and Fertilisers Limited.

The lands are required immediately by us for the erection of our factory buildings, in order that we can be ready to start the manufacture of chemicals derived from sulphuric acid which we shall be purchasing from the Mysore Chemicals & Fertilisers Ltd.

We enclose herewith the map showing the location of the site which we wish to acquire. They bear survey Nos. 46 and 47. We are prepared to deposit immediately with the Bank of Mysore or the State Huzur Treasury a sum of Rs.1000/- for the acquisition of the above lands.

We shall be very grateful to you if you can kindly write to the Deputy Commissioner, Mysore District, to hand over possession to us immediately of these lands, pending acquisition proceedings being instituted.

The earlier we proceed with the matter of acquisition we shall be in a position to construct the buildings for the factory and be in a position to start manufacturing operations.

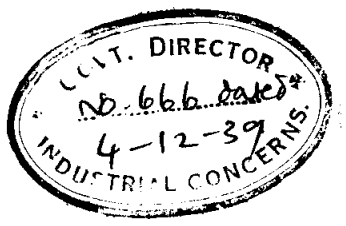
Regarding the waiver of the fine for converting the lands for industrial purposes we shall be thankful if you will kindly recommend to the Government for waiver of the fine.

We beg to remain,

Yours faithfully,
THE MYSORE CHEMICALS MANUFACTURES LTD.

DIRECTOR

MOK/KSL



Sub for info.

1) Mr. Krishnaswamy met me and has agreed to put up his plant for the manufacture of sulphates at Belagula in the site below the Mysore Chemicals & Fertilizers, where he could take his acid practically on tap without any packing or transport.

2) As at present arranged this Co will be expected to take 5 tons a day of our sulphuric acid at an agreed rate, with effect from the 15th January 1940. If he is given possession of the land immediately, he will be able to erect the plant.

3) I suggest that
(a) the Deputy Comm., Mysore be

by addressed (d. o. by the Secy Dev. Dept) to commence
acqn proceedings at once, and put the Director in
possession of the land, ~~the~~ pending formalities,
~~on~~ taking a deposit of Rs 1000/- or whatever he
may consider reasonable from him towards the
Compensation

and (b) the ~~the~~ conversion fees may be waived -

4) A map ~~of~~ showing the land
proposed to be ~~acquired~~ acquired is attached -

PROSPECTUS

The Company has been formed generally with the objects specified in the Memorandum of Association and particularly for the purpose of establishing and carrying on the business of manufacturers of and dealers in Industrial and Fine Chemicals.

The demand for industrial chemicals in India has steadily been on the increase during recent years. The reason for this is the rapid industrial development which is taking place, and which is evident by the increasing number of factories for manufactured products throughout India. We have seen an enormous increase in the number of cotton and textile mills, sugar refineries, alcohol distilleries, cement factories, soap works, tanneries, pharmaceutical laboratories, paint and varnish manufactures, match factories, paper mills, etc., all over the country. Mysore State has taken a leading part in the development of indigenous industries.

All these industries use chemicals in some form or other, and the source of supplies is mainly by import hitherto. The manufacture of chemicals in India has not kept pace with the development of industries, and large quantities of chemicals have been imported yearly.

An idea of the total imports of all kinds of chemicals into India can be had from the following figures :—

	1932-33	1933-34	1934-35	1935-36
Rs.	2,71,24,967	2,70,05,640	2,92,39,278	3,11,88,336

India being mainly an agricultural country, large quantities of chemicals will be required when more scientific and intensive methods of cultivation, destruction of pests, prevention of plant diseases, preservation of timber, etc., are employed. Once the chemical industry is started successfully, it will soon be in a position to help the rapid agricultural development of India.

It is remarkable that Japan which had practically no chemical industry some ten years back, is now on an equal footing with any Western country, and is in a position to compete with them successfully in foreign markets. India is in a much better position than Japan with regard to raw materials like coal, iron ore, salt etc., and similarly well placed as Japan with regard to cheap skilled labour.

In South India, the demand for chemicals has increased enormously and since sulphuric acid and other heavy chemicals still continue to sell at the same high price as they were selling years back, there has been no scope for manufacture of other chemicals. Industries depending on cheap supplies of chemicals are at a disadvantageous position having to pay heavily for their raw materials of chemicals. In Mysore State, especially this difficulty is very keenly felt, as a number of textile mills, tannery, sugar factory, steel works, already exist and others like the paper mills, cement works, spun silk mills, etc., will begin to operate shortly. There are several water purification schemes already and many more will form part of the new factories. Year by year, large amounts of copper sulphate are being increasingly utilised by coffee and tea plantations. It is high time therefore that chemical factories are established near important consuming centres. These chemical factories can not only supply the requirements of the various industries, but also be in a position to convert the bye-products and waste material of the latter

into valuable products. Instances may be mentioned of bye-products such as methanol, acetate of lime, and wood tar at the Steel Works at Bhadravati, molasses produced by the sugar factory, tannery and wool refuse and possibly also paper mill waste.

The Government of Mysore have been the first to recognise the importance of the development of chemical industries within the State. They have sponsored the establishment of a new concern " The Mysore Chemicals and Fertilizers, Limited " for the manufacture primarily of the important fertilizer, ammonium sulphate, and also sulphuric acid and ammonia which are required for its production. These two latter chemicals are expected to be made in larger quantities than necessary, for ammonium sulphate, so that the surplus could be made available for the development of other chemical manufactures.

The Government of Mysore, having also recognised the importance of encouraging the development of the other important chemical manufactures, side by side, have encouraged the starting of another public company by granting various valuable concessions to the promoters Messrs. Dr. P. Krishnamurti and M. O. Krishnaswamy, for the manufacture of industrial chemicals. The following is the text of the Government Order granting the concessions :—

Order No. D. 8383-8448/ I. & C. 182-36-15 Dated 7/8 June 1937

Dr. P. Krishnamurthi and M. O. Krishnaswamy of Messrs. Emberuman & Co., Bangalore City, have approached Government with the request that certain concessions and facilities be granted to them in connection with their scheme for floating a Joint Stock Company to manufacture sulphuric acid and certain chemicals for which there is a ready demand in the Mysore State and surrounding areas. The Department of Industries and Commerce have also under active consideration a scheme for the manufacture of sulphuric acid, chemical manures and some heavy chemicals. But as the Company proposes to manufacture and market a different line of chemical products, there is room for an undertaking of the kind proposed.

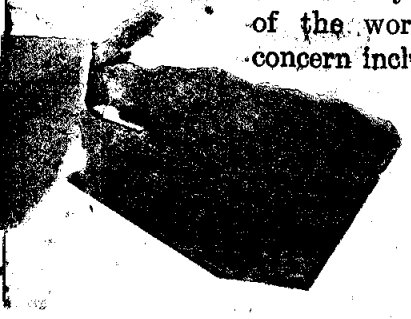
2. Government are pleased to direct that the following facilities and concessions be granted to the proposed Company.

(i) Private land measuring 13 acres and 5 guntas out of S. Nos. 2, 3, 9 and 70 of the Tarabanahalli Village of Hessarghatta Hobli and assessed at Rs. 21-12-0 be acquired at the cost of the Company under the provisions of part VII of the Land Acquisition Regulation and the Revenue fine payable for the conversion of agricultural land for non-agricultural purposes waived.

(ii) 25,000 gallons of water per day be supplied free of cost for five years at the duct of the Hessarghatta Reservoir, the Company making their own arrangements for pumping. The Company should make proper arrangements to ensure that the waste water from the works does not contaminate any source of supply to the Arkavati River.

(iii) Government would be prepared to purchase the product of the Factory to the extent of their requirements, provided quality and price are satisfactory.

Dr. P. Krishnamurti, by establishing the first gas mantle and rare earth chemical industry in South India, has demonstrated that chemical industries can successfully be established in competition with reputed manufacturers in other parts of the world. The Company has an unique advantage in that the sponsors of the concern include technical chemists of repute.



The following chemicals are in the programme of the Company :—

Aluminoferric, Aluminium Sulphate, Alum, Copper Sulphate, Hydrochloric and Nitric Acids, Ferrous Sulphate, Magnesium Sulphate, Sodium Sulphate and Glauber's Salt, Sodium Sulphide, Zinc Chloride, Magnesium Chloride and other derived Chemicals.

The proposed programme of the Company provides a plentiful cheap supply of the essential chemicals needed for the manufacture of glue and gelatine from waste material like leather scraps, hides, bones, etc. This will be taken up later.

Another profitable line of chemicals which is on the programme of this Company is the manufacture of **Photographic Chemicals** for which there is specially a good demand in South and Western India. Certain film producing interests who are large consumers have already been interested in the purchase of these chemicals from this Company. This recent phenomenal growth in the film industry ensures a regular and increasing demand for these chemicals.

The manufacture of Electro-chemicals such as Hydrogen Peroxide, Sodium Perborate, etc., is also in the programme and will be taken up as soon as cheap power for this purpose is available.

As the manufacture of Sulphuric Acid and Ammonia on a large scale has now been undertaken by Messrs. The Mysore Chemicals and Fertilizers, Ltd., at Mysore, for the purpose of making synthetic fertilizers like Ammonium Sulphate, it is considered more economical to purchase the entire requirements of sulphuric acid from the surplus acid to be produced by the above Company at rates and terms to be mutually agreed upon. Negotiations are already in progress in this direction.

Initially, it is proposed to manufacture chemicals of the following programme :—

Aluminoferric	...	1000 tons.
Alum	...	500 tons.
Copper Sulphate	...	300 tons.
Ferrous Sulphate	...	50 tons.
Magnesium Sulphate	...	50 tons.
Sodium Sulphate & Glauber's salt	...	700 tons.
Hydrochloric acid	...	50 tons.
Nitric acid	...	20 tons.
Sodium Sulphide	...	100 tons.
Barium Sulphate	...	100 tons.
Ammonium Chloride	...	200 tons.
Ammonium Carbonate / Ammonium Bi-Carbonate		50 tons.
Calcium Chloride	...	50 tons.
Magnesium Chloride	...	100 tons.
Zinc Chloride	...	20 tons.

The estimated total value of finished products calculated on the lowest rates prevailing in Mysore is about Rs. 5,00,000.

The estimated net profit after providing for all working expenses and depreciation, and calculated on the lowest price obtaining in Mysore, is about Rs. 30/- per ton. The output of the factory is expected to be about 3,500 tons per annum.

It is estimated that the major portion of the output will be absorbed in Mysore State.

For the above programme, able in Mysore State. It is propose limestone available locally. It is Mysore will be available to the Cor required are situated within easy di

It is the aim of the Compa valuable finished products.

The minimum subscription o ment is 5,000 shares. As more than 5 by the Directors and their friends wh proceed immediately to allotment.

For the above programme, a good proportion of the raw materials is available in Mysore State. It is proposed to utilise the magnesite from Kadakola, and limestone available locally. It is expected that copper ore, known to occur in Mysore will be available to the Company shortly. The sources of other minerals required are situated within easy distances.

It is the aim of the Company to convert the minerals in Mysore State into valuable finished products.

It is estimated that after providing for all expenses and reserve for depreciation, it will be possible to declare **a dividend of about 12 to 15 per cent** on the paid up capital.

The management of the Company will be in the hands of Messrs. Krishna & Co., Ltd., Managing Agents, at present constituting of Messrs. M. O. Krishnaswamy and Dr. P. Krishnamurti, who will be ex-officio Directors on the Board.

None of the Directors have any interest in the promotion of the Company except Messrs. Dr. P. Krishnamurti and M. O. Krishnaswamy who at present constitute the firm of Messrs. Krishna & Co., Ltd., who are the Managing Agents of the Company.

The qualification of a Director shall be the holding in his own name of 100 shares in the Company.

The sitting fees of the Directors shall be a sum not exceeding Rs. 20/-. They will be paid travelling expenses for attending meetings.

The following agreements are to be entered into with the Company.

1. Agreement with the Managing Agents, Messrs. Krishna & Co., Ltd., appointing them for period of 20 years on the following terms :—

An office allowance of Rs. 600/- per mensem and a commission of 10 per cent on the net profits which will be arrived at after allowing all working expenses and depreciation but without any deduction in respect of income-tax, super tax or allocation to reserves.

This office allowance of Rs. 600/- per mensem will be increased to Rs. 750/- in such years when net profit is 12½ per cent or more.

When the net profit is not less than 25 per cent on the paid up capital, the Managing Agents will be entitled to a commission of 12½ per cent of the net profit.

2. Agreement whereby Messrs. M. O. Krishnaswamy and Dr. P. Krishnamurti transfer the concessions granted by the Government of Mysore to them to this Company.

On a poll, a shareholder shall be entitled to have one vote for every five shares held by him, and none for fraction thereof.

The preliminary expenses are expected to be about Rs. 4,000/- excluding brokerage.

A brokerage not exceeding 4 annas per share, at the discretion of the Directors, will be allowed to recognized brokers on shares allotted.

The minimum subscription on which the Directors can proceed to allotment is 5,000 shares. As more than 5,000 shares have already been subscribed for by the Directors and their friends which will be fully allotted, the Directors will proceed immediately to allotment.

A copy of the prospectus certified by the Chairman and 2 Directors has been delivered for registration to the Registrar of Joint Stock Companies, Civil and Military Station, Bangalore, and the Registrar of Joint Stock Companies in the City of Madras.

The Company has no place of business in British India.

Application for shares shall be made in the form accompanying this prospectus and shall be forwarded with application money of Rs. 2 per share to the Mysore Chemical Manufactures Ltd., District Board Buildings, Kempegowda Road, Bangalore City or to the Bank of Mysore Ltd., Bangalore and branches, and the Indian Bank Limited, Madras and branches.

Sir,

I have the honour to forward herewith for favour of sanction and publication in the Mysore Gaztte, Declaration statements both priliminary and final in duplicate both in English and Kannada, in respect of the acquisition of properties noted therein, of Hulikere village of Belagola Hobli, Seringapatam taluk, required by the Mysore Chemicals Manufacturers, Ltd., for the erection of their factory etc.,

2. The estimated cost of acquisition of these lands, will be met out of the Funds of the Company. They have executed an agreement with the Deputy Commissioner, Mandya, on behalf of Government to deposit Rs.1500/-, towards the cost of acquisition etc., as required under Sec.41 of the Land Acquisition Act.

3. The preliminary notification as per Sec.4 and the hearing objections under Sec. 5A of the L.A.Act, as amended by Regulation 1 of 1927 are unnecessary as the lands have already been demarcated and measured and the need is obvious and urgent, and therefore may kindly be ordered to be done away with.

4. As the work is of an urgent nature and the Company
